

SALMAN KHAN

Full Stack Developer (MERN)

+92-341-5981261 | salmank.official751@gmail.com | linkedin.com/in/salman-khan-ai-software-engineer/ | github.com/Salman-Khan751

PROFESSIONAL SUMMARY

Full Stack Developer (MERN) with a BS in Artificial Intelligence, building scalable web applications with React.js, Node.js, Express.js, FastAPI, Flask, MongoDB, MySQL, and PostgreSQL. Skilled in REST API design, database architecture, and integrating AI/ML capabilities — NLP, speech-to-text, computer vision — into production-ready, full-stack systems.

EXPERIENCE

Full Stack Developer — BIIT

Jul 2025 – Present

AI Call Intent & Emotion Detection Dashboard

React.js, FastAPI, Python, MongoDB, Whisper, Wav2Vec2.0, spaCy, Transformers

- Built a full-stack web dashboard that classifies telecom call intent and emotion (angry, neutral, frustrated) in real time, giving support teams immediate visibility into call quality and faster issue escalation.
- Engineered REST APIs connecting a React.js frontend to FastAPI backend services, integrating Whisper speech-to-text and Wav2Vec2.0/Transformer-based emotion-detection models into a single live monitoring tool.
- Designed normalized MongoDB schemas to store and query structured call data efficiently, enabling fast, reliable dashboard reporting.

Vehicle Detection for Toll Revenue Protection

React.js, Flask, Python, MongoDB, YOLOv5, OpenCV

- Built a full-stack application for real-time vehicle detection and toll monitoring, combining a React.js interface with a YOLOv5-powered Flask backend.
- Designed Flask REST APIs to manage vehicle data in MongoDB, improving toll audit accuracy and reducing manual monitoring overhead.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, C#, .Net

Frontend: React.js, Redux, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, Responsive Design

Backend: Node.js, Express.js, Flask, FastAPI, REST APIs, GraphQL, JWT Authentication, Mongoose

Databases: MongoDB, MySQL, MSSQL, PostgreSQL

AI & ML: ML, DL, NLP, Transformers, CNN, RNN, LSTM, GRU, OpenCV, TensorFlow, PyTorch, Scikit-learn, Hugging Face, NLTK

DevOps & Tools: Git, GitHub, Docker, AWS, Postman, CI/CD, Agile/Scrum

PROJECTS

MediTranscribe — AI Medical Transcription & Clinical Assistant (Final Year Project)

2025 – 2026

Python, Flask, React.js, MySQL, OpenAI Whisper, Fine-Tuned BERT, NLP

- Built a full-stack system enabling real-time doctor-patient consultations with automated, AI-powered transcription.
- Developed REST APIs supporting multiple user roles with secure authentication and structured EHR workflows, including patient records, scheduling, and vitals tracking.

E-Commerce Backend System

2026

Node.js, Express.js, MySQL, JWT Authentication, REST API

- Built a scalable RESTful backend using Node.js, Express.js, and MySQL, implementing JWT authentication, role-based access control (RBAC), and CRUD APIs for users, products, carts, and orders.
- Designed relational database schemas, optimized SQL queries, and integrated RESTful APIs to improve backend performance, security, and scalability.

Real-Time NLP Chatbot

2024

Python, TensorFlow, Flask, LLaMA

- Developed a multi-turn, context-aware chatbot served through scalable Flask APIs for deployment-ready conversational AI.

Movie Recommender System

2024

Python, Scikit-learn, Pandas

- Built a collaborative-filtering recommendation engine for personalized movie suggestions, processing large datasets with Pandas.

Java Weather App

2022

Java, JavaFX, OpenWeather API

- Developed a real-time desktop application that fetches live weather data and displays interactive forecasts via API integration.

EDUCATION

Bachelor of Science in Artificial Intelligence (BSAI) — PMAS Arid Agriculture University, Rawalpindi, Pakistan | 2022–2026

CERTIFICATIONS

Cybersecurity – Microsoft / LinkedIn | 2024

Data Analysis – Microsoft / LinkedIn | 2024

Generative AI – Microsoft / LinkedIn | 2023

AWS Lambda – Great Learning | 202
