SUMMARY

Software Engineer with a BS in Artificial Intelligence and strong expertise in Java backend development and scalable system design. Experienced in building RESTful APIs, microservices, and database-driven applications using Java, Spring Boot, and MySQL. Skilled in object-oriented programming, API architecture, and modern development practices. Passionate about building efficient, maintainable, and production-ready software systems.

EXPERIENCE

Software Engineer — BIIT

Jul 2025 – Present

AI Call Intent & Emotion Detection Dashboard

- Developed RESTful backend services for real-time telecom call processing.
- Built APIs for storing and retrieving structured call data.
- Designed modular backend architecture for scalability.

Vehicle Detection for Toll Revenue Protection

- Built backend services for real-time vehicle and toll data management.
- Designed database schemas and REST APIs.
- Worked in Agile environment using Git-based workflows.

SKILLS

- **Programming:** Java (Core, J2EE), JavaScript, TypeScript, Reactive Programming, Python, C++, C#, .NET
- **Web & Backend:** JSP, JSF, Spring Boot, Node.js, Express.js, Flask, React.js, Vue.js, HTML5, CSS3, Bootstrap, Tailwind CSS, jQuery, Tomcat, Jetty, JBoss
- **Messaging & APIs:** REST APIs, SOAP, ActiveMQ, RabbitMQ, Redis, gRPC
- **Databases:** MySQL, MSSQL, MongoDB, PostgreSQL, GraphQL
- **Frameworks & Tools:** Spring Boot, Hibernate, Apache Kafka, JasperReports, Elasticsearch (ELK), Apache Karaf
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms, SDLC, Agile
- **Testing:** JUnit, Mockito
- **AI & ML:** Machine Learning, Deep Learning, NLP, Transformers, ANN, RNN, CNN, LSTM, Roboflow
- **ML Frameworks & Libraries:** TensorFlow, PyTorch, Scikit-learn, Hugging Face, spaCy, NLTK, OpenCV
- **Data Science & Visualization:** NumPy, Pandas, Matplotlib, Seaborn
- **DevOps & Tools:** Git, GitHub, Docker, Kubernetes, AWS, Postman, CI/CD

PROJECTS

E-Commerce Backend System | 2026

- Developed a RESTful backend for an e-commerce platform using Java, Spring Boot, and MySQL with secure authentication and product, cart, and order management.

MediTranscribe – Medical Transcription System | 2025

- Developed backend APIs for a medical transcription platform to manage authentication and structured medical records.

Real-Time Chatbot Backend | 2024

- Built scalable backend services for a conversational AI system using Python and REST APIs.

POS (Point of Sale) | 2022 – 2023

- Migrated a legacy POS system into a highly scalable and configurable digital product.

Java Weather Application | 2022

- Built a desktop application using Java and JavaFX to fetch and display real-time weather data via API integration.

Collage Maker | WhatsScan | Write It Down | 2020 – 2021

- Developed and published Android applications with features including image filters, QR scanning, and task reminders.

EDUCATION

Bachelor of Science in Artificial Intelligence (BSAI) – PMAS Arid Agriculture University, Rawalpindi, Pakistan | 2022 – 2026

CERTIFICATIONS

- **Cybersecurity** – Microsoft / LinkedIn | 2024
- **Data Analysis** – Microsoft / LinkedIn | 2024
- **Generative AI** – Microsoft / LinkedIn | 2023
- **AWS Lambda** – Great Learning | 2023
